

IAIA13 List of Sessions *(preliminary program)*

Please see page 9 of the preliminary program for descriptions of session formats.
See pages 9-22 for session descriptions.

Based on their respective session formats, planned activities, and expected outcomes, the session chairs have determined whether their sessions accept papers. If you can not find your preferred session in the dropdown box on the abstract submission form, it is because the session does not accept papers. Sessions are listed below in alphabetical order for your reference.

These sessions do not accept papers.

- Alberta oil sands: conference findings
- Can IA/SEA influence decisions affect the global environment? (II)
- From EA to Impact and Benefit Agreements: Private Governance and Consent
- Governing Geoengineering through Environmental Assessment
- How can we make the oil and gas industry environmentally responsible?
- IA and Climate Change Next Steps: 2013 and Beyond
- IA Young Practitioners Forum
- InfluencIA: A Hypothetical with a twist, a loop and a Circle
- International Guidelines for SIA: the next generation
- Negotiating impacts and impact mitigation with oil and gas companies
- Research and Impact Assessment (I)
- Research and Impact Assessment (II)
- Social Impact Assessment Clinic
- Systems approach to improving effectiveness of Impact Assessment
- Talking About the Next Generation of Impact Assessment
- The Next Frontier: development of Northern and Arctic Regions
- The science and art of international HIA practice: key messages (Health I)
- The science and art of international HIA practice: let's discuss (Health IV)
- The vanishing North: can impact assessment help reverse the trend?
- To be or not to be? Alternatives analysis in impact assessment (II)

These sessions accept papers by invitation only.

- A new generation of regional transportation infrastructure development
- A vision for policy appraisal: policy makers and scientists in dialogue
- Application of IFC Performance Standards by Financial Intermediaries
- Biodiversity-inclusive environmental assessment
- Energy needs vs. indigenous interests and climate change concerns
- Environmental Monitoring in Alberta: the Next Generation
- From IA to sustainable performance through participatory engagement and capacity building
- GHG Emission Accounting and Performance Criteria for Development Projects
- Hard Limits: EIA and a new generation of Clean Energy Projects in BC
- Harmonizing upward: next generation EA for overlapping jurisdictions
- Highway Mitigation: new insights for practitioners
- IAIA SEA performance criteria: suitable for the next generation?
- Innovative modeling tools for sustainable energy policy assessment
- Integrating health in Impact Assessments: opportunities not to be missed
- International Finance Institutions: Emerging ESIA standards and practices
- Regional and Ecosystem-Based Approaches in CEAM: A Next-Generation Approach
- Voluntary SIA: Ideas and insights from beyond the regulatory context

These sessions welcome papers.

- Added value of SEA
- Addressing project impacts to biodiversity: critical roles for IA
- Applying the EU SEA Directive: Case studies and innovative approaches
- Arctic Hydrocarbons: Addressing Community Aspirations and Effects
- Asia-Europe dialogue on impact assessment implementation
- Beyond regulatory standards: expanding social license to grow
- Broader SIAs in conflict/post-conflict states can create value
- Can IA/SEA influence decisions affect the global environment? (I)
- Changing EIA focus and trends to expect in the future
- Chinese IA system and trends
- Climate change and impact assessment: the North meets the South
- Climatic variability and ecosystem change: coping and adaptation options
- Closing gaps for EIA in the next generation: Sharing biodiversity data
- Communication between IA practitioners and decision makers
- Communication with stakeholders and general public: from state of the art to innovation
- Community responses to the next generation of energy technologies
- Consultation with Indigenous peoples and FPIC in impact assessment
- Consulting and engaging indigenous communities in the extractive sector
- Country experiences with oil industries and impact assessments
- Crisis? What crisis? Decision makers and climate change adaptation
- CSR in a globalizing world: the role of civil society in shaping its future
- Cultural resources as a component of SEA
- Designing and implementing strategies for a biodiversity action plan
- EIA: success and failures
- Emerging good practices in responsible oil and gas operations
- Engaging aboriginal communities in impact assessment and mitigation
- Environmental Baseline Data in the IA Process: What is Appropriate?
- Environmental Monitoring in the Oil Sands and Impact Assessment: Aquatics
- Environmental Monitoring in the Oil Sands and Impact Assessment: Terrestrial
- Equal Access to Information and the Role of EA Registries
- Evolving Standards for EA: The Consultant's Perspective
- Experiences with different types of SEA: from legislation to big projects
- Following up IA Follow-up: The next generation?

(list continues on next page)

These sessions welcome papers (*continued*)

- Guidelines and tools for integrating climate change in impact assessment
- How am I supposed to do this? Methods to address ecosystem services in ESIA
- How are Aboriginal Values and Traditional Knowledge Reflected in EIA?
- Hydropower projects: Tumultuous journey or a peaceful march from approval
- IA as a tool to make healthier decisions in the Arctic region
- IA for integrated resources management in a climate-stressed world
- Impact assessment and Indigenous peoples in extractive industries
- Impact assessment innovation and success
- Impact of dams on communities: lessons learned and the future role of SIA
- Incorporating ecosystem services in ESIA: practices, challenges, and opportunities
- Indigenous peoples and CSR in the mining and extractive sectors
- It's all in the mix: The lost art of integration
- Local action for IA: governance and the next generation of decision makers
- Mine Planning and Environmental Assessment
- Modern Interdisciplinary Approaches for ESHIA in the Arctic
- New Models for Capacity Building in Environmental Impact Assessment
- Next Generation IA: Tiering of IA and Planning
- Operationalizing an IA: follow-up and implementation challenges
- Orphans re-generating impact assessment
- Partnerships over the project lifecycle: the next generation for IA
- Public Participation in IA follow-up
- Public Participation, Value Conflict, and the Politics of Impact Assessment
- Scoping: Are We Getting it Right?
- SIA and CSR in the mining and energy sectors: a merging of generations?
- Significance: How and Why is it Determined?
- Social License to Operate: The next generation of measuring and monitoring
- Social Media and Public Participation in IA
- Socio-environmental Risk in EIAs
- Strategic environmental assessment and climate change
- Strategic marine assessments
- Streamlining EIAs and the Approval Process: How far do we go?
- Survival in a Changing World: Experience in Assessing Climate Risk
- Teaching Social Impact Assessment: Pedagogies and Practice
- Territorial Impact Assessment: A Tool To Support Territorial Cohesion
- The application of FPIC: current practice, future trends
- The Contribution of New Technologies in Cultural Heritage Studies for IA
- The effective use of partnerships in EIA
- The emerging role of Indigenous peoples in impact assessment
- The expanded FAO definition of agriculture and its new relevance to ESIA
- The impact of new transportation facilities on urban gentrification
- The science and art of international HIA practice: reflecting the range of HIA Practitioners (Health II)
- The science and art of international HIA practice: old issues and new applications (Health III)
- To be or not to be? Alternatives analysis in impact assessment (I)
- Tools to predict impacts of economic development projects on biodiversity
- Trends in human rights in a post-Ruggie world
- Understanding and Managing Cumulative Impacts in Resource Regions
- Use and abuse of adaptive management in impact assessment: where to next?
- Using ecological analysis to assess impacts on rights of indigenous peoples
- Using impact assessment to inform benefit agreements at a global scale
- Using health impact assessment to achieve sustainable goals
- Using SEA for Effective Development Planning
- Utopian goals or effective tools? Public and stakeholder engagement in SEA
- What gets measured gets managed: applications of IA for corporate responsibility
- When things go sideways: understanding emotion, opposition and outrage
- White elephants of impact assessment
- Who has the right to define cultural heritage values in Impact Assessments?
