Introduction

SEA in Multilateral Development Agencies (MDAs)

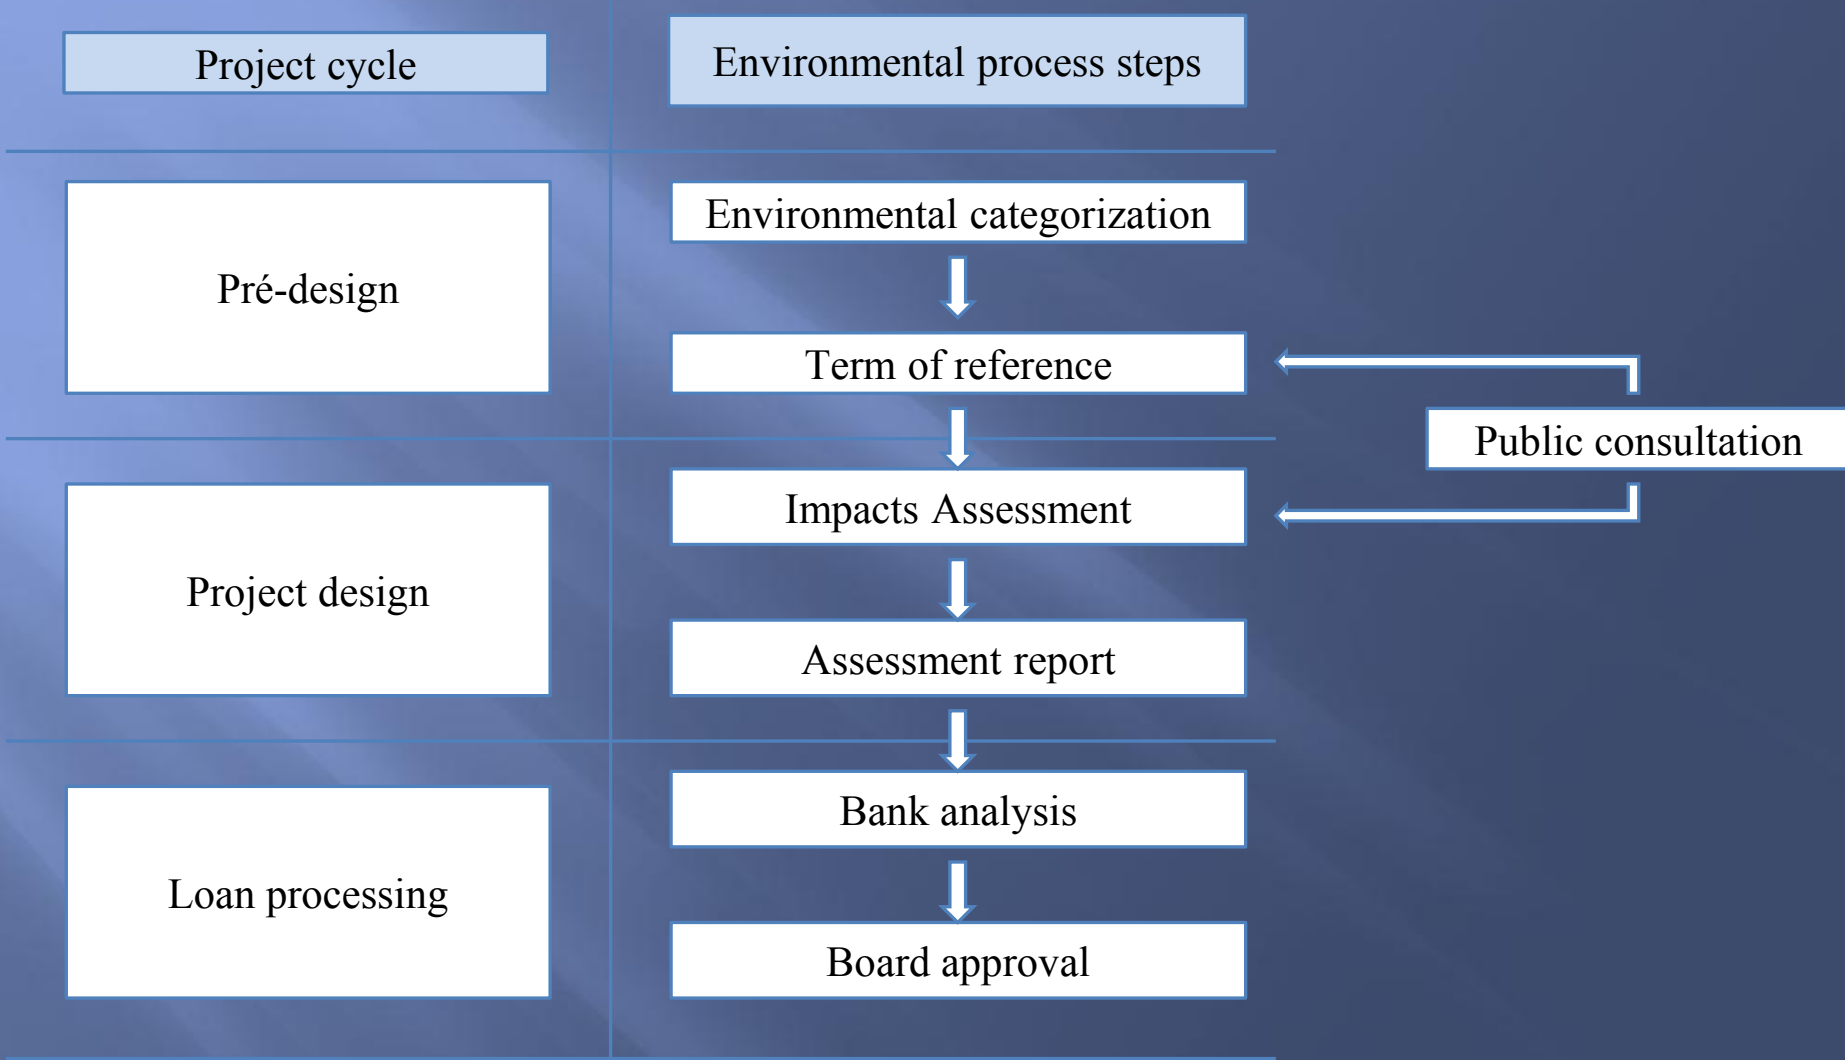

Limitation do EIA

Change to focus on higher-level investments
(Policies, Plans and Programs)

WB – 1999
AfDB – 2001
ADB – 2003
IDB - 2006

	Category A/1			Category B/2
	Programme	Plan	Policy	PPPs
World Bank	X	X	X	Preliminary Analysis required
African Development Bank	X	X	-	ESMP
Inter-American Development Bank	X	X	X	ESMP
Asian Development Bank	X	-	-	Preliminary Analysis required

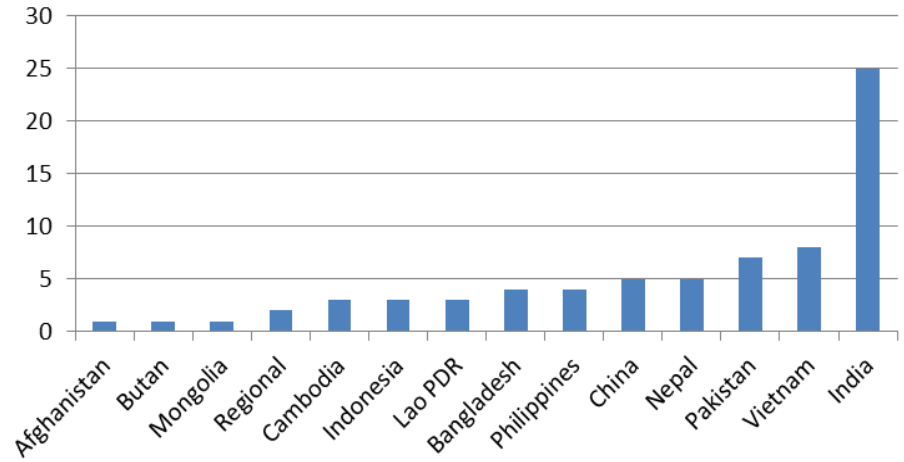

Multilateral Development Agencies SEAs

178 SEAs

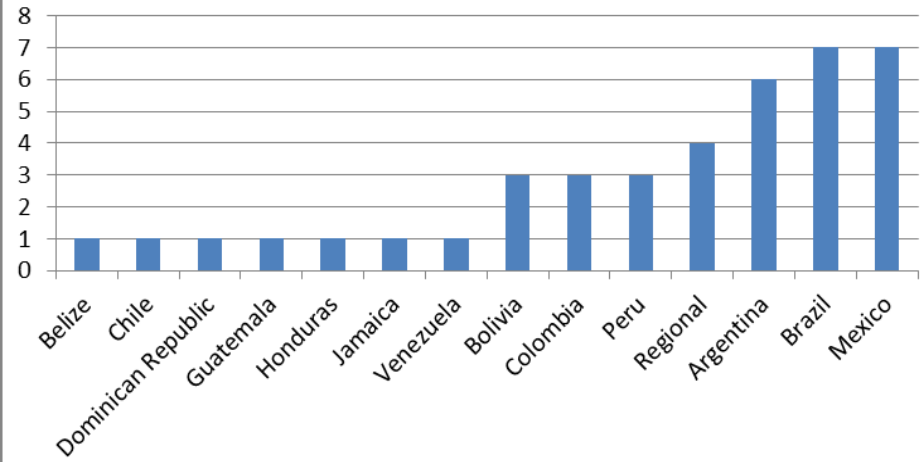

Sector	Number of applications
Transport	27
Energy	25
Water	17
Agriculture	13

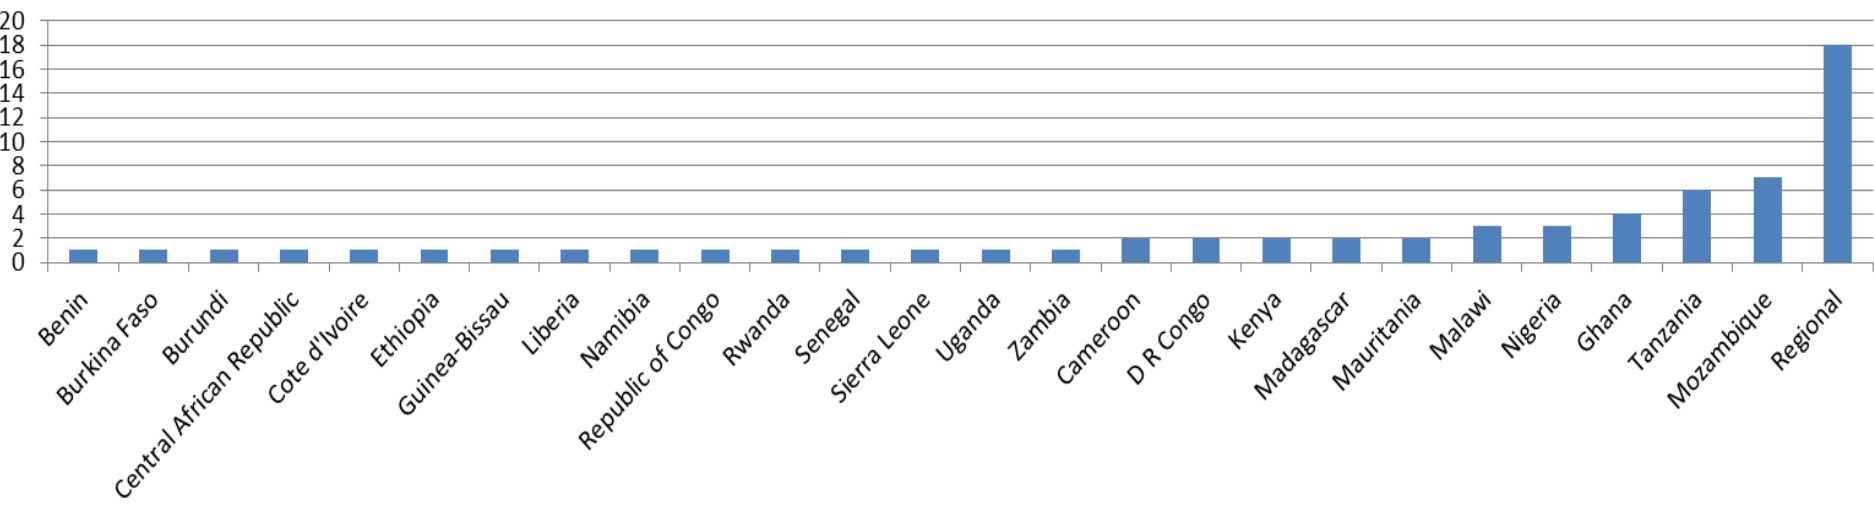

Asia

Latin America and Caribbean

Africa

Conclusion

Procedures for Strategic Environmental Assessment of the MDAs undergo constant review and revision, and therefore are considered successful environmental safeguards.

The increased number of SEAs applications over time, related to different types of plan and programmes, demonstrates that MDAs are encouraging and stimulating the practice of SEA in developing countries which mostly do not have laws that require the application of this tool
