ECO Score
A NEW ENVIRONMENTAL STANDARD
We are a leading underground precious metals producer focusing on high grade silver and gold deposits, with over 50 years’ operating experience in the Americas.

We currently operate three underground mines, two located in southern Peru and one in southern Argentina. The ore at our operations is processed into silver-gold concentrate or dore.

Hochschild Mining PLC is listed on the Main Market of the London Stock Exchange and is headquartered in Lima, Peru. In addition, the Group has an office in Argentina and a corporate office in London.
A NEW PURPOSE

« Responsible and innovative mining committed to a better world »
We are always responsible, we innovate, we always look for efficiency, we inspire and promote talent.
Contribute to a sustainable future, always acting with responsibility and environmental excellence.
Companies collect large amount of environmental data.

Companies have not been able to express their environmental performance in an objective and precise manner to decision-makers.

Environmental performance in many cases is related to human behavior, an abstract concept.

All of this has hindered the effective understanding and management of companies' environmental footprint.
ECO Score

Hochschild we have managed to express our environmental performance in a numerical value; that is, a universal language.
ECO Score

Innovative tool that can be adopted for all industries

The ECO Score can generate significant savings due to the reduction of the environmental footprint, efficient use of resources, and minimization of risks.

It encourages the workforce to achieve a common environmental purpose: to contribute to a sustainable future.
The objective is to have ZERO deviations from the maximum allowable limits.

The objective is to have ZERO environmental incidents.

The objective is to have a maximum of two observations per mining unit per year.
Water consumption per worker

The objective is to keep water consumption below 250 liters/person/day

Waste generation per worker

The objective is to generate 0.5 kg/person/day

Percentage of Marketable waste

The objective is to market or donate more than 75% of the collected industrial waste.

Environmental

The objective is to achieve more than 95% compliance of critical performance indicators.
ECO Score

Can be seen as an option that all industries can adopt among its employees to promote a strong environmental culture and create value for stakeholders.
In 5 years we improved our environmental performance by 73%
Since the implementation of the ECO Score, we have saved 268,305 m³ of drinking water, which is equivalent to [number of bottles of water].
reduced domestic waste generation

Since the implementation of the ECO Score, we reduced waste by more than 20%
Since the implementation of the ECO Score, we reduced 52% the ratio of observations per inspection carried out by the environmental regulator.
Every year we recognize the mining unit that has achieved the best ECO Score. The results are shared with the whole company on a monthly basis.

PERFORMANCE OBJECTIVES

With the aim of encouraging our employees to take up challenges and develop new skills, abilities and knowledge, we have established an annual individual performance objectives plan, which is aligned to our corporate objectives.

When the Corporate Objectives are achieved, employees receive a bonus.
The ECO Score also strengthens the positive relationship with our stakeholders.
ECOScore

Contributing to a sustainable future, always acting with responsibility and environmental excellence
THANK YOU!
Let’s continue the conversation!
