SEA in Austria's High Level Transport Planning

Success factors for SEA effectiveness

Success Factor # 1: Legal Framework

One federal law – one process – one (environmental) report

Requirement for
planning a high
level transport
network

Langtitel Bundesgesetz über die strategische Prüfung im Verkehrsbereich (SP-V-Gesetz) BGBl. I Nr. 90/2007 (NR: GP XXV RV 99 AB 1062 S. 117; BR: AB 7361 S. 724.) (CELEX-Nr. 32601L0042)	
Änderung BGBl. I Nr. 25/2014 (NR: GP XXV I A 261/A AB 59 S. 11; BR: AB 9103 S. 82.)	
Text	Zweck
§ 1. (1) Zweck dieses Bundesgesetzes ist es, vorgeschlagene Netzveränderungen bereits vor Erstellung von Güter- und Vandalenverkehrsplan, die der Bundesminister der Bundesminister für Verkehr, Innovation und Technologie der Bundesregierung zur Beschleunigung vorziehen beschließt und deren Gegenstand diese vorgeschlagenen Netzveränderungen sind, einer strategischen Prüfung zu unterziehen. (2) Durch dieses Bundesgesetz wird die Richtlinie 2001/42/EG des Europäischen Parlaments und des Rates über die Prüfung der Umweltwirkungen bestimmter Pläne und Programme, ABt. Nr. 1197/01 vom 21. Juli 2001, umgesetzt.	
Begriffserläuterungen § 2. (1) „Netzveränderung“ bedeutet jede Änderung des bundesweiten hochrangigen Verkehrsnetzes. (2) Zum „bundesweiten hochrangigen Verkehrsnetz“ gehören: 1. Bundesautobahnen, 2. Wasserstraßen, 3. Bundesstraßen, (3) „Zustandshalter“ sind die Umwandlung der betroffenen Länder gemäß § 2 Abs. 4 des Umweltverträglichkeitsprüfungsgesetzes 2009 – UVPG 2009, BGBl. I Nr. 65/2009, die Landesregierungen der betroffenen Länder und der Bundesminister der Bundesminister für Land- und Forstwirtschaft, Umwelt und Wasserwirtschaft. (4) Ein Land ist ein „benachteiligtes Land“, wenn es von den direkten oder indirekten Auswirkungen einer Netzveränderung betroffen werden kann. (5) Unter „Öffentlichkeit“ ist eine oder mehrere natürliche oder juristische Personen und deren Vereinigungen, Organisationen oder Gruppen zu verstehen. (6) Bezieht es, war eine Netzveränderung vorzuziehen. Eine Netzveränderung vorzuziehen sind: 1. der Bund, vertreten durch den Bundesminister der Bundesminister für Verkehr, Innovation und Technologie, 2. die Länder, 3. die Autobahn- und Schnellstraßen-Finanzierungs-Aktiengesellschaft, 4. die Öffentliche Infrastruktur Aktiengesellschaft, 5. die via donau – Österreichische Wasserstraßen-Gesellschaft m.b.H., 6. sonstige befugte Errichtungsgesellschaften. (7) Befugte Errichtungsgesellschaften sind Gesellschaften, die entweder durch Bundesgesetz oder Bundesvertrag oder auf Basis eines Bundesvertrages oder staatsvertraglicher Errichtung errichtet wurden und deren satzungsmäßiger oder gesellschaftsvertraglicher Zweck es ist, Bundesautobahnen	

Requirement for
carrying out an
SEA

Objectives for the high level transport network in the federal law

- *Provision of high quality infrastructure*
- *Connection to international network*
- *Benefit from comparative advantages*
- *Economic and social cohesion*
- *Favourable cost-benefit ratio*

Integrated network
planning and SEA

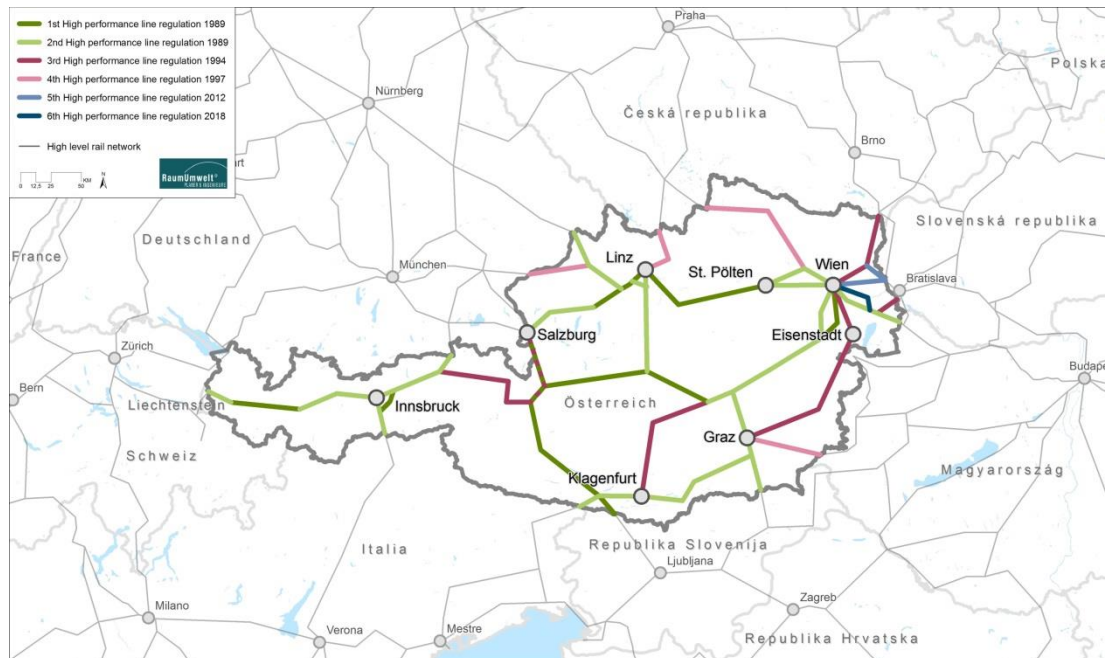

Success Factor # 1: Legal Framework

“Plan” according to law: Node-edges-model

Text

Folgende Eisenbahnen (Strecken bzw. Streckenteile einschließlich der notwendigen Eisenbahnanlagen) werden zu Hochleistungsstrecken erklärt:

1. Salzburg - Wörgl
2. St. Michael - Klagenfurt - Villach
3. Wien - Eisenstadt - Oberwart - Graz - Klagenfurt - Villach - Staatsgrenze Österreich/Italien
4. Wien - Staatsgrenze bei Bernhardsthal
5. Parndorf - Staatsgrenze bei Kittsee

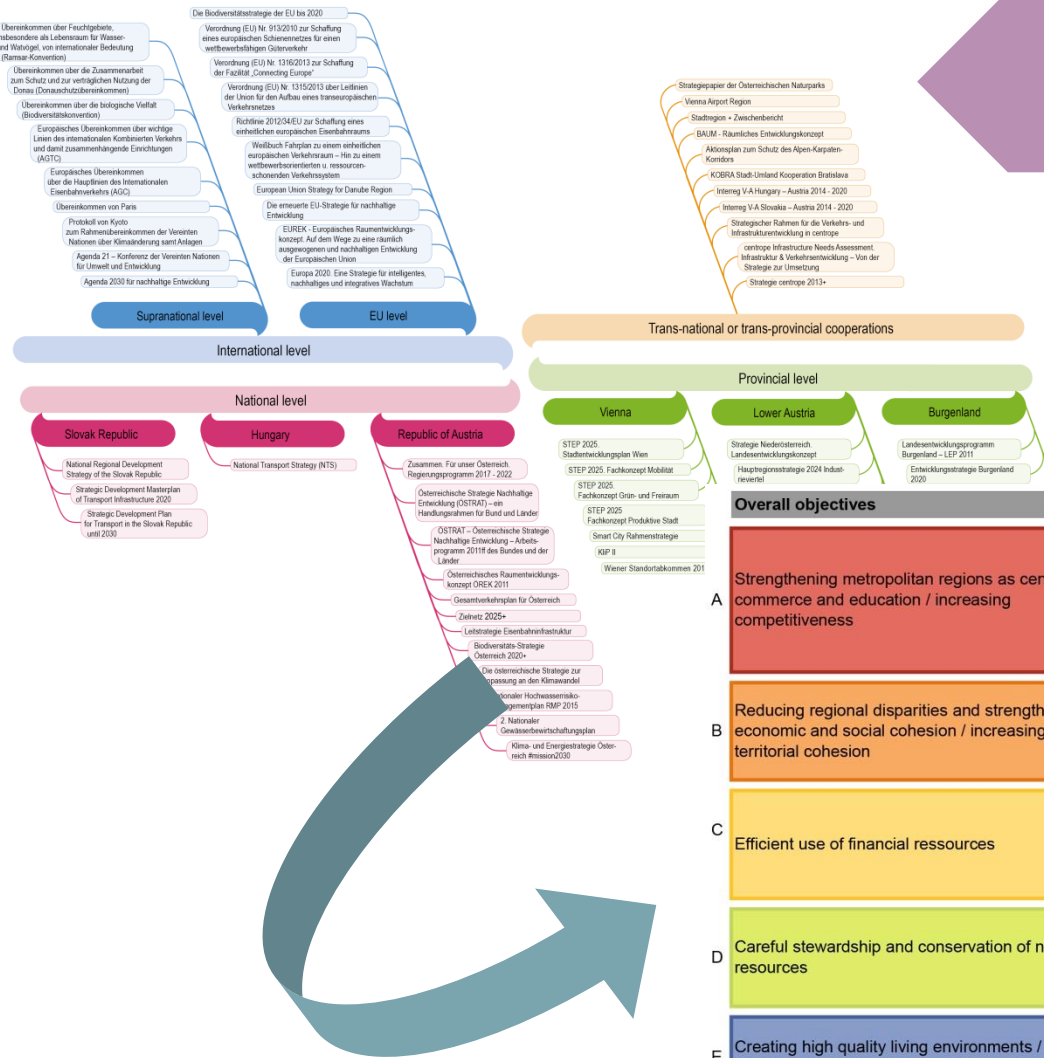

Success Factor # 2: Effective Guidelines

Guidelines require “strategic” alternatives assessment

Success Factor # 2: Effective Guidelines

Guidelines require an evaluation framework which is generated from plans and programmes.

Overall objectives

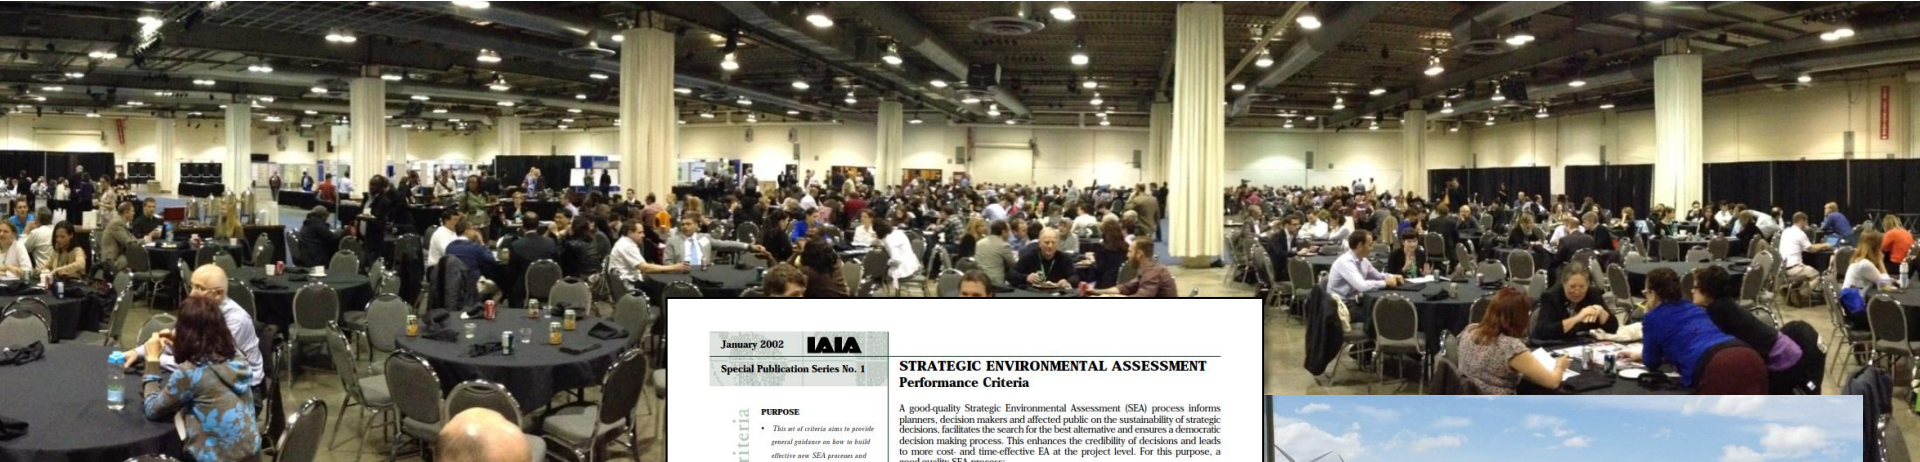

- A** Strengthening metropolitan regions as centres for commerce and education / increasing competitiveness
- B** Reducing regional disparities and strengthening economic and social cohesion / increasing territorial cohesion
- C** Efficient use of financial resources
- D** Careful stewardship and conservation of natural resources
- E** Creating high quality living environments / securing social inclusion

Sub-objectives

- A1** Integrating the transport network into a trans-european, multimodal transport system
- A2** Securing economic competitiveness and high quality locations within a global, interconnected economic system
- A3** Improving access to education, R&D and innovation centres
- A4** Improving connections between states
- B1** Improving access and accessibility for passenger transport and commercial locations
- B2** Improving access to essential locations and central places
- B3** Strengthening economic regions and local economic cycles
- C1** Developing cost-efficient, high performance transport systems
- C2** Providing needs-based transport infrastructure
- C3** Optimizing total expenditures for transport services
- C4** Securing systemic adequacy
- D1** Climate protection and energy efficiency
- D2** Conserving biodiversity
- D3** Protecting soil and water and their function as basis of human livelihood / reducing barriers, avoiding habitat fragmentation and soil sealing
- E1** Reducing harmful immissions and increasing traffic security
- E2** Conserving cultural and natural heritage and preserving regional identity
- E3** Promoting social security and equality

Success Factor # 3: Devoted Protagonists

But from where do we get our devotion?

January 2002 **IAIA**
Special Publication Series No. 1

IAIA Strategic Environmental Assessment Performance Criteria

PURPOSE

- This set of criteria aims to provide general guidance on how to build effective new SEA processes and evaluate the effectiveness of existing SEA processes.

BACKGROUND

- SEA has recently become a "hot" issue, and IAIA sought to provide a practical product on the subject to assist its members. This set of criteria was developed by Rob Verboom of the Netherlands EIA Commission in consultation with members of the IAIA SEA Section and through discussion at special workshops held in 1998, 1999, and 2000 during the IAIA annual conferences.

CONSULTATION PROCESS

- This document is the result of an ongoing discussion over a three-year period by members of the IAIA Section, both over the Internet and at several IAIA annual conferences. The SEA performance criteria have been used and tested in practice by a number of IAIA members and were endorsed by the IAIA Board of Directors in November 2001.

STRATEGIC ENVIRONMENTAL ASSESSMENT Performance Criteria

A good-quality Strategic Environmental Assessment (SEA) process informs planners, decision makers and affected public on the sustainability of strategic decisions, facilitates the search for the best alternative and ensures a democratic decision making process. This enhances the credibility of decisions and leads to more cost- and time-effective EA at the project level. For this purpose, a good-quality SEA process:

- Is integrated**
 - Ensures an appropriate environmental assessment of all strategic decisions relevant for the achievement of sustainable development.
 - Addresses the interrelationships of biophysical, social and economic aspects.
 - Is tied to policies in relevant sectors and (transboundary) regions and, where appropriate, to project EIA and decision making.
- Is sustainability-led**
 - Facilitates identification of development options and alternative proposals that are more sustainable¹.
- Is focused**
 - Provides sufficient, reliable and usable information for development planning and decision making.
 - Concentrates on key issues of sustainable development.
 - Is customized to the characteristics of the decision making process.
 - Is cost- and time-effective.
- Is accountable**
 - Is the responsibility of the leading agencies for the strategic decision to be taken.
 - Is carried out with professionalism, rigor, fairness, impartiality and balance.
 - Is subject to independent checks and verification
 - Documents and justifies how sustainability issues were taken into account in decision making.
- Is participative**
 - Informs and involves interested and affected public and government bodies throughout the decision making process.
 - Explicitly addresses their inputs and concerns in documentation and decision making.
 - Has clear, easily-understood information requirements and ensures sufficient access to all relevant information.
- Is iterative**
 - Ensures availability of the assessment results early enough to influence the decision making process and inspire future planning.
 - Provides sufficient information on the actual impacts of implementing a strategic decision, to judge whether this decision should be amended and to provide a basis for future decisions.

¹ I.e., that contributes to the overall sustainable development strategy as laid down in Rio 1992 and defined in the specific policies or values of a country
