Fire Area

A woman with grey hair, wearing a blue jacket and a red patterned scarf, is pointing her right hand towards a landscape. The landscape features a river, a grassy bank, and a line of trees under a cloudy sky. The woman has a concerned expression on her face.

If you don't intervene it will flow from
the mountains in Switzerland and end up in Rotterdam.

You see what I mean? – A review of visual tools for inclusive public participation in EIA decision-making processes

Ana Roque de Oliveira*, Maria Partidário

CEG-IST, Instituto Superior Técnico, Universidade de Lisboa, Portugal

González et al. (2008)

Survey: public participation practice and emerging information technology (**IT**) and Geographic Information System (**GIS**)-based approaches with regard to public involvement **in environmental planning**

SURVEY

Rovaniemi, Finland
December 2017

January-March 2018

Exploratory Survey- Use of Visual tools in Public Participation (PP)

PhD Research by Ana Roque de Oliveira (IST – University of Lisbon, Portugal)

WHAT YOU'VE DONE

PLEASE CONSIDER **YOUR MOST RECENT (last 2 years) PP EXPERIENCE** in the context of an Environmental Impact Assessment (EIA) or in any other decision-making process

1 – What is/was your role? (check all that apply)

Project promoter Administration/Government Public/NGO/other interested or affected party

2 – Which visual tools were used by the proponent in the **project presentation**? (check all that apply)

Maps Diagrams Photographs Drawings Paintings Graphs

Videos Scale Models Other (please specify) _____

3 – Indicate which visual tools were used by the public/NGO/other interested/affected parties to **present comments and participate in the public debate** (check all that apply)

Maps Diagrams Photographs Drawings Paintings Graphs

Videos Scale Models Other (please specify) _____

PLEASE CONSIDER **YOUR OVERALL PP EXPERIENCE**. If you think visual tools are relevant,

4 – Do you see any **advantage(s)** of the use of visual tools? (If yes, please specify)

- _____
- _____

Videos Scale Models Other (please specify) _____

PLEASE CONSIDER YOUR OVERALL PP EXPERIENCE. If you think visual tools are relevant,

4 – Do you see any **advantage(s)** of the use of visual tools? (If yes, please specify)

- _____
- _____

5 – Do you see any **disadvantage(s)** of the use of visual tools? (If yes, please specify)

- _____
- _____

6 – How can one **improve** the way visual tools (VT) are used in PP? (check all that apply)

Keep VT simple (do not include excessive information) Use adequate scales (e.g., in maps, graphs)

Combine VT with explanatory text (so that VT are less ambiguous) Use VT that respect the public's culture

Use VT that consider the public's literacy level Use interactive VT (e.g., participatory mapping)

Other (please specify) _____

7 – Did you publish/do you know a relevant reference on the use of visual tools in PP? (If yes, please indicate full reference) _____

WHAT YOU THINK

Thank you for your cooperation!

Please return this survey to Ana Roque de Oliveira during the workshop *Tomorrow's Arctic EIA*, or via email:
anaroliveira@tecnico.ulisboa.pt

70% responses (n=42)

4% responses (n=9)

WHAT YOU'VE DONE

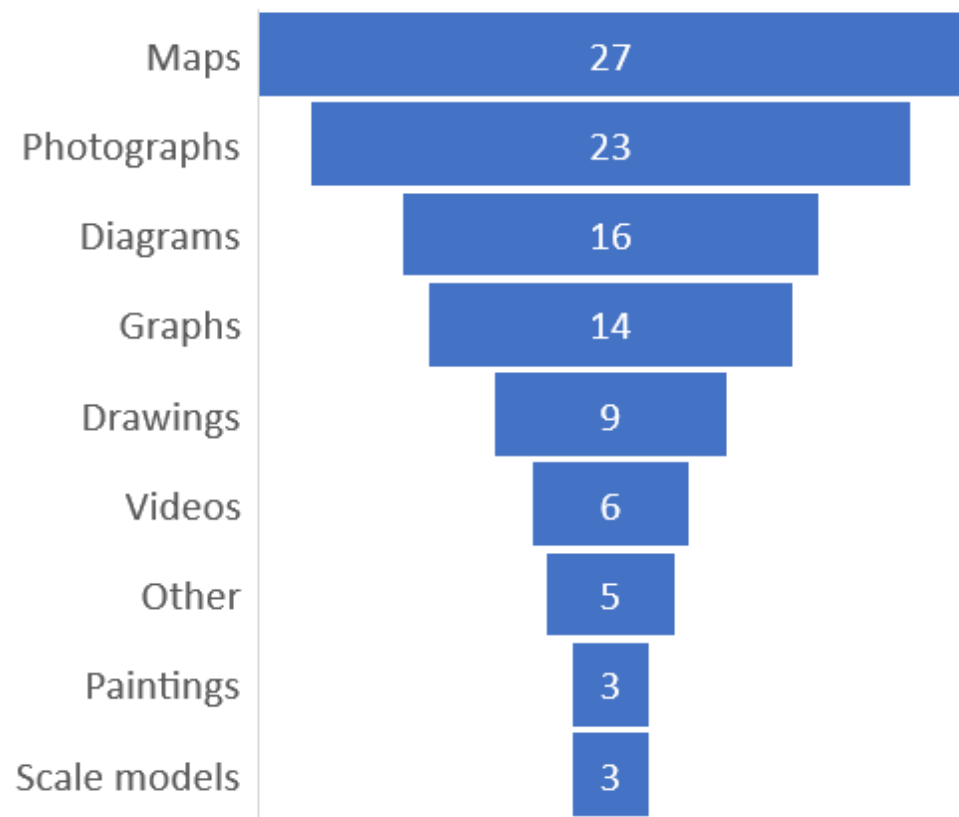

WHAT YOU THINK

Visual Tools used by the Proponent

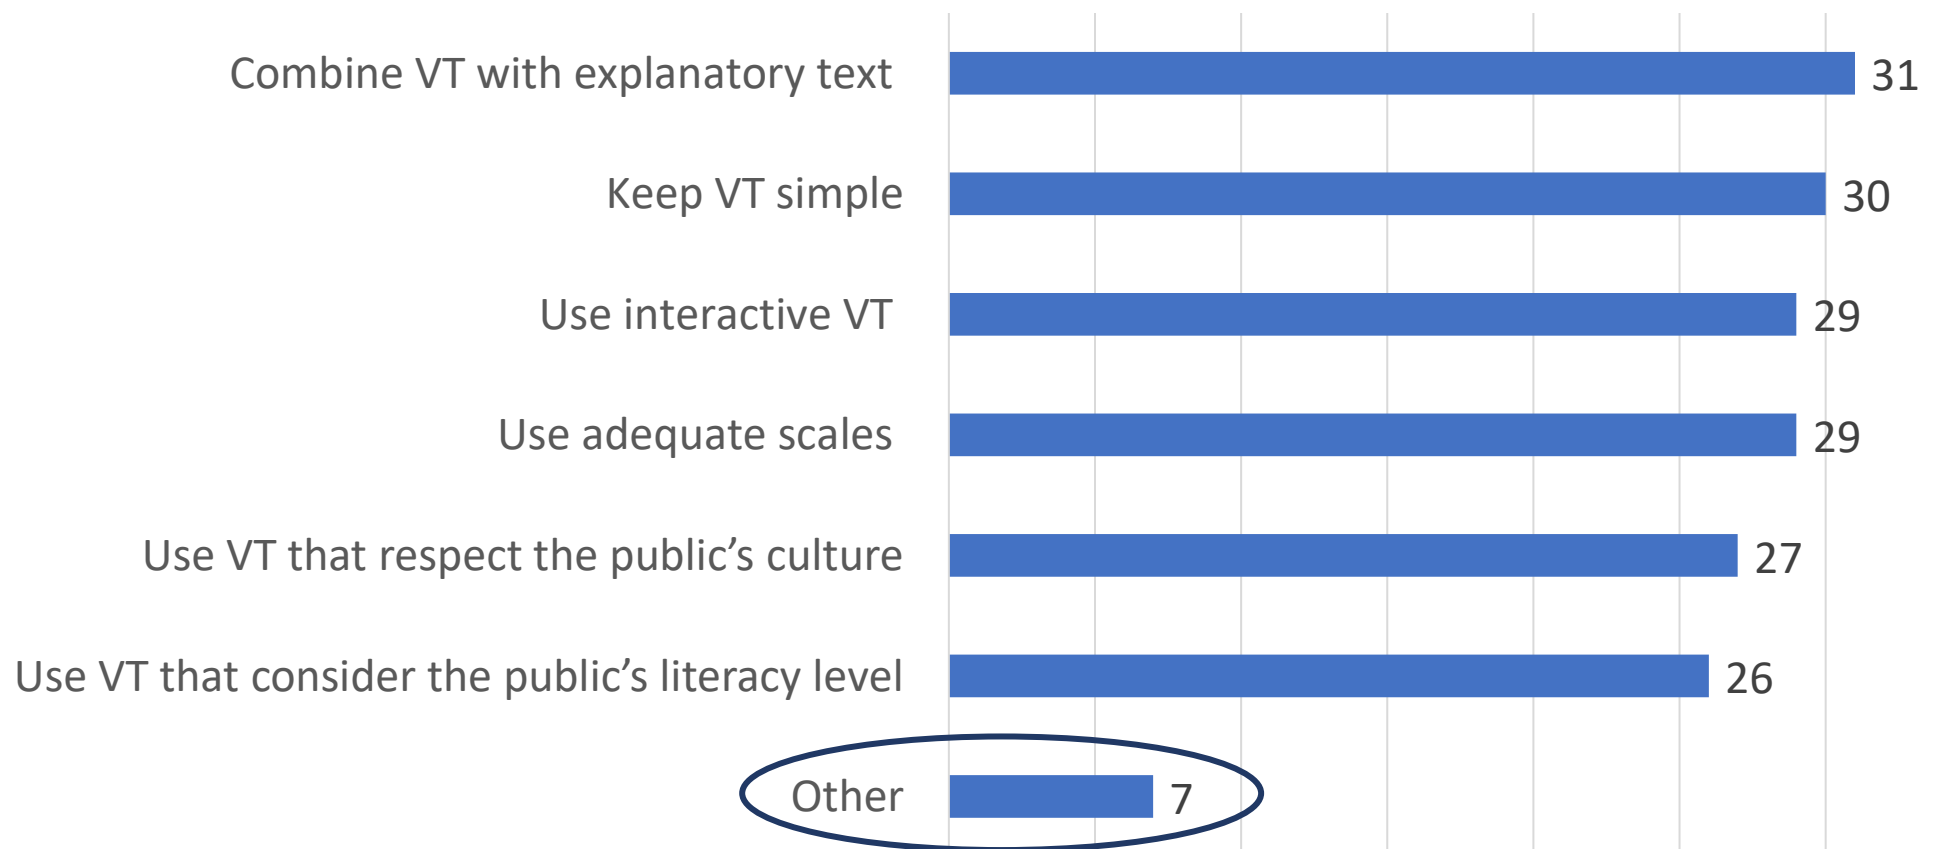

Visual Tools used by the Public

How to Improve the use of Visual Tools in PP?

IMPROVEMENTS TO VISUAL TOOLS

OTHER

*Use **color maps** that are visible to **color blind** people*
*Use only **relevant maps, graphs** (avoid confusion and manipulation)*

*Consider **what is important to the audience**, e.g., for Inuit, need to see key areas, so photos are most helpful*

***Show to reference groups** before event (check audience's perceptions)*

*Acknowledge **complexity of systems***

*Many participants will want **more information** - they do not want things "dumbed down".*

BENEFITS (+) AND CHALLENGES (-) OF VISUAL TOOLS

COGNITIVE ISSUES

CULTURAL/SOCIAL ISSUES

EMOTIONAL ISSUES

COGNITIVE ISSUES

Efficiency of communication

Understanding context & projects

Data **manipulation**, propaganda

CULTURAL/

SOCIAL ISSUES

Familiarity with visual tools

*Maps, photos and videos are **familiar** to indigenous peoples in my region*

Lack of cultural **concepts**, values

*Visual tools need to have **cultural translation***

Framing effect

*Visual tools need to be **explained** not to confuse the public*

Emotions can be awakened

*Critical thinking may be **clouded** by emotions*

*Get the message across in a more **powerful** way*

**EMOTIONAL
ISSUES**

*Visual tools draw people's **attention***

CONCLUSIONS

1 Visual Tools may promote inclusive public participation

Key concepts: Perception / Integration / Emotions & Decision-Making

2 Visual Tools should be adequate to the stakeholders

Key concepts: Technical, Cognitive, Social/Cultural, Emotional issues

RECOMMENDATIONS

- 1 Move away from the “**one size fits all**” approach

RECOMMENDATIONS

- 1** Move away from the “one size fits all” approach
- 2** Allow for stakeholders’ active participation in the **choice and design** of the Visual Tool

Visual tools are good if the audience chooses them
