

Recovery model promotes income sustainability

Kuching, 02 October 2018

Fishery displacement in Tanah Merah village

- In 2000, fishing is 74% of livelihood, the most of households' income was below poverty line
- In 2002, housing project started; implemented fishery, agriculture programs & worker skill training
- In 2004, people moved; restricted zone applied
 - Walkway around the LNG fence completed; bigger boats provided;
 - Village cooperative initiated
 - Commercial agriculture and fishery post harvesting initiated
 - In 2006, most HH income above the poverty line
- In 2008, Safety exclusion zone applied that impact to the fishing activities
 - number of fishermen dropped to 20% in 2009; the HH income was stuck from 2007 to 2009

Recovered and growing

- In 2008, stocking points initiated in Tanah Merah;
 - cooperative signed “supply contract” with LNG catering for agriculture and fishery products
- In 2011, cooperative expanded businesses
 - Trading, supplier and retail
 - TMB stocking point supply 27 tons of vegetables (USD 50K) to the LNG catering;
 - average income increased three times of 2002
- In 2016, livelihood diverse and sustain
 - indigenous business growth; In 2017, Tanah Merah cooperative won contract to supply stationery for Tangguh LNG
 - Indigenous people skilled increased: 55 workers in which 28 are skilled level and one manager in Tangguh LNG
 - income increased almost four times of 2002
