ABOUT IAIA

The International Association for Impact Assessment (IAIA) is the leading global network on best practice in the use of impact assessment for informed decision making regarding policies, programs, plans, and projects. IAIA has members in more than 100 countries and affiliates operating in 16 countries, including South Africa, Ghana, Cameroon, Mozambique, Nigeria, and Zambia.

IAIA brings together impact assessment practitioners from around the world through conferences and training programs to provide an international forum for advancing innovation and communication of best practice and furthering the development of capacity in impact assessment.

SYMPOSIUM THEMES AND OBJECTIVES

Across the world, land access for public and private sector projects often causes significant physical and economic displacement of communities. Resettlement is typically fraught with challenges, risks and controversy. Poorly undertaken resettlement can result in a number of impoverishment risks, like landlessness, marginalization, food insecurity and social disarticulation.

The symposium will improve understanding of land access and resettlement issues, share lessons learned and discuss opportunities to improve performance.

Symposium topics include:

- Government and private sector-led resettlements
- Livelihood restoration and improvement
- Integrated planning, assessment and monitoring
- Security of land tenure
- Alignment between international standards, corporate policies and national legislation
- Engagement and community relations
- Negotiation and consultation
- Project-related employment and procurement opportunities
- In-migration
- Culturally appropriate resettlement housing
- International and Mozambican case studies

PRE- AND POST-SYMPOSIUM EVENTS

An optional technical visit will be held before the symposium (20 October) and an optional training course on Land Access and Resettlement will be held after the symposium (23-24 October).
