

Climate Change Science for Impact Assessment

Michael Gerrard

michael.gerrard@law.columbia.edu

Abstract: This talk will summarize the current state of the law on impact assessment and climate change in the U.S., in other countries, and under global agreements. The relevant federal and state regulations and ensuing litigation will be covered, with special reference to the draft guidance from the U.S. Council on Environmental Quality, and the states of California, Washington and New York. The major court decisions concerning analysis of climate issues under the National Environmental Policy Act and its state equivalents will be summarized. Based on this, legal guidance for impact assessment professionals will be discussed.

Summary: This talk will summarize the current state of the law on impact assessment and climate change in the U.S., in other countries, and under global agreements. The relevant federal and state regulations and ensuing litigation will be covered. Based on this, legal guidance for impact assessment professionals will be discussed.
